EDUCATION

12th science (85%)
Shakti higher secondary school, Rajkot

Bachelor of Technology (9.12 CGPA)
Charotar University of Science and Technology (CHARUSAT)

SOFT SKILLS

Time management

Conflict resolution

Leadership

Teamwork

TECHNICAL SKILLS

React   Flutter

Node JS   Firebase

MongoDB

Express JS

I enjoy creating websites and My flexibility with different technologies allows me to bring ideas to life on the web.

7 MINI WEBSITES

2 APPLICATION UI DESIGNS

Projects

SmartVids
Using MERN Stack (Under development)

Welcome to SmartVids, where teachers use animated videos to make learning fun and imaginative! Here, students can suggest topics they want to learn about. Teachers then create animated videos on those topics, turning students' ideas into engaging lessons. It's a cool way for students and teachers to learn together in a friendly and interactive way.

EnjoyEat
Using MERN Stack

Our Website EnjoyEat is really required for avoiding making customers wait, we have created an online table booking tool for all hotels that shows you the current line and estimates how long it will take. All you have to do is specify the number of people you want to seat at a table for.

Connectify (Internship)
Using React, Firebase

Connectify is a helpful website that makes it easy for users to connect with admins who control certain devices. Instead of sending emails to request access, users can simply use Connectify to send a request for the device they need. Admins can then quickly accept or decline the requests, saving everyone the hassle of writing emails back and forth. It's a simple and efficient way to streamline the process of gaining access to devices.

EnjoyEat (Application)
Using Flutter

EnjoyEat app, made with Flutter, is super easy to use! The buttons are simple to understand, making it a breeze to find your way around. Everything is designed to be friendly and quick, so you can enjoy your food without any fuss. It's like having a helpful friend to guide you through the app!
